INDUSTRIEARMATUREN

Shut-off valves • Gate valves • Butterfly valves • Ball valves • Strainers
Non-return valves • Flow sight glasses • Steam traps • Heat exchangers • Accessories

“We are your system supplier for all kind of valves and accessories, competent, quickly and at a good price level.”

Welcome!

Components and complete systems from only one qualified partner.

We, ACI - Industriearmaturen GmbH, are located in Eschweiler, in the German state of North Rhine-Westphalia, not far from Aachen.

We supply all kind of industrial valves and components, and not just individual elements, but also complete systems. Our qualified staff will provide you with competent and comprehensive advice on our valves and fittings, your applications and how to optimize your systems. Your advantages in our strong partnership are obvious:

- optimized logistics
- favorable terms
- only one single contact, which saves you time and money
- comprehensive advice and support for analyzing and optimizing your systems

We also provide advice for valve automation and system optimization, at your location, if you wish. When it comes to the industrial handling of gaseous and liquid media, we are the right partner for you!

High-Quality products, consulting and service

We share our extensive experience and expertise as well as pass on the favorable terms we enjoy from our long-standing partnerships with renowned manufacturers and suppliers who meet the same high standards we set for ourselves.

Personal consultation, a wide and deep range of products, and our commitment to quality and service make us your ideal provider of industrial valves, accessories and optimization solutions. From shut-off valves up to heat exchangers, from complete systems to accessories: providing the highest quality products, consulting and service is the philosophy behind our success. That's why our customers are so satisfied.

We look forward to meet you!

Our wide and deep range of products

Here you will find an overview of our product range of industrial valves and accessories. As a specialist for system solutions, we place great value on quality and precision, which is reflected in our product ranges. Get in touch with us – we will be glad to assist you!

We supply:

- » shut-off valves
- » gate valves
- » butterfly valves
- » tank sight glasses
- » pressure reducers
- » flow sight glasses
- » steam traps
- » ball valves
- » manometers and manometer valves
- » swing check valves and non-return valves
- » tubular sight glasses
- » sight glasses
- » strainers
- » heat exchangers
- » accessories

All products are available in DIN and ANSI versions. ACI also specializes in manufacturing of any custom designs and special solutions you might need.

STOP VALVES

We supply straight, Y and angle stop valves with packing gland or bellow seal, with flange connections, welding ends, socket weld ends or threaded connections.

Optional versions such as limit switches or other cone variations are also possible

GATE VALVES

We provide gate valves with flat, oval and round body, as well as knife gate valves in all possible variations and connection types in DIN or ANSI versions. The gate valves can be manually operated or equipped with pneumatic or electric actuators.

BUTTERFLY VALVES

We supply butterfly valves for use in

- » chilled and cooling water systems
- » heating systems
- » drinking water and service water systems,
- » wastewater treatment plants, swimming pools,
- » power plants, natural gas plants, landfill gas plants,
- » shipbuilding
- » etc.

STEAM TRAPS

We supply steam traps of all major manufacturers: ball-float traps, bimetallic steam traps, membrane capsule steam traps, vaposcope for steam traps and steam trap control devices.

The steam traps are available with DIN and ANSI flange connections, butt weld ends, socket weld ends or threaded connections.

BALL VALVES

Manually operated ball valves with threaded, flanged or weld end connections as well as automatic ball valves with electric or pneumatic actuators and their accessories: solenoid valves, limit switches for position feedback, etc.

SWING CHECK & NON-RETURN VALVES

Check valves are ideal for use in industrial piping systems to transport liquid and gaseous substances. Even in systems where high demands are made on the material, non-return valves are the first choice.

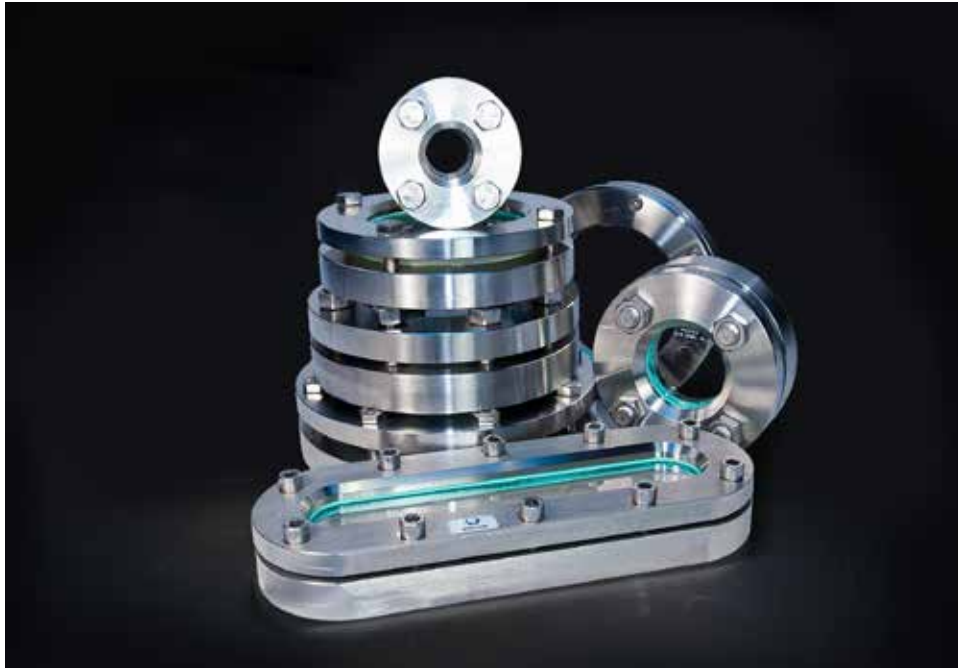

We provide swing check valves and non-return valves in each possible design and connection type.

SIGHT GLASS FITTINGS

We also provide sight glass fittings in all versions such as sight-flow glasses in straight, angled or three-way type with glass plates of borosilicate glass, soda-lime glass or quartz glass. Round tank sight glasses in accordance with DIN 28120 and DIN 28121 are as much part of our standard product line as oval and rectangular variations.

In addition, we also provide technical glass and mica sheets.

HEATING TECHNOLOGY EQUIPMENT

Consulting, testing, delivery– We provide you with thermotechnical valves which make your system even more efficient:

- » heat exchangers
- » steam generators
- » condensers
- » domestic water heater
- » electric heating systems

We have everything in stock – whatever you need.

For small companies an own stock keeping sometimes is not possible or advisable due to spatial or economical reasons. During peak seasons, other companies complain that they don't have enough storage capacity. But we can provide you with MAXOS® sight glasses immediately from our warehouse. We always keep large quantities of these glasses in stock.

We also have the corresponding sight glass flanges per DIN 28120, gaskets and bolts in stock.

As a special service, we will be glad to store your (annually) defined quantities for you as well. That way you can be sure you will always get what you need on time.

Get in touch with us today!

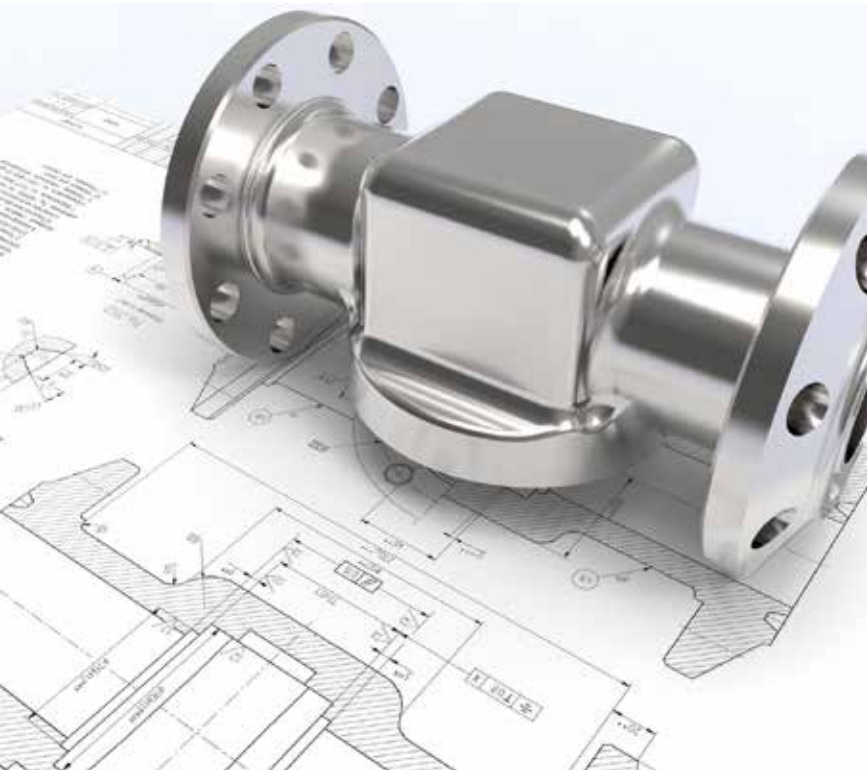

Haven't seen what you need?

No problem! We'll design and manufacture it according to your special requirements. Our team of specialists has many years of experience and is always ready to provide you with the right product for your needs.

From the CAD drawing and the prototype up to the finished product, we can handle designing and making your custom-made product. We'll work together with you from the outset to advise you and to determine the appropriate specifications (such as materials).

Just send us an email or give us a call!
